## **DETAILED ACTION**

## Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, 19-29, 30-33, 34-40, 41-48, 55-61, 62-66, and 67-70, drawn to processing a received signal in tracking and identifying pilot signals, classified in class 375, subclass 148.
- II. Claims 49-54, drawn to a network controller used to make a soft handoff decision for a wireless communication system, classified in class 455, subclass 442.
- 2. The inventions are distinct, each from the other because:

Inventions I, and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are claims 1-18, 19-29, 30-33, 34-40, 41-48, 55-61, 62-66, and 67-70 drawn to processing a received signal in tracking and identifying pilot signals; claims 49-54 drawn to a network controller used to make a soft handoff decision for a wireless communication system.

3. Because these inventions are distinct for the reasons given above and have required a separate status in the art as shown by their different classification and by their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2637

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
